# Webmark V3: View 3 - About

---

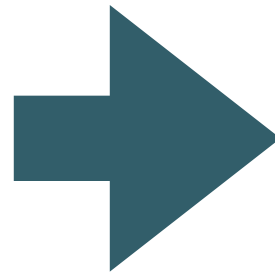

Contact details for the author of the app  
(these can be fictitious company or  
person).

An image which shows a map showing  
where the company / person is located

+ a form allowing the user to leave a  
message for the author

# Concept

Enhance the  
Webmark  
application  
Features to be  
evolved across 3  
domains:

Authentication  
Statistics  
Images

# Authentication

Evolve the Webmark application to support user signup / login

Once logged in, the user can manage their own bookmark collections

Bookmark collections are maintained separately for each user

# Statistics

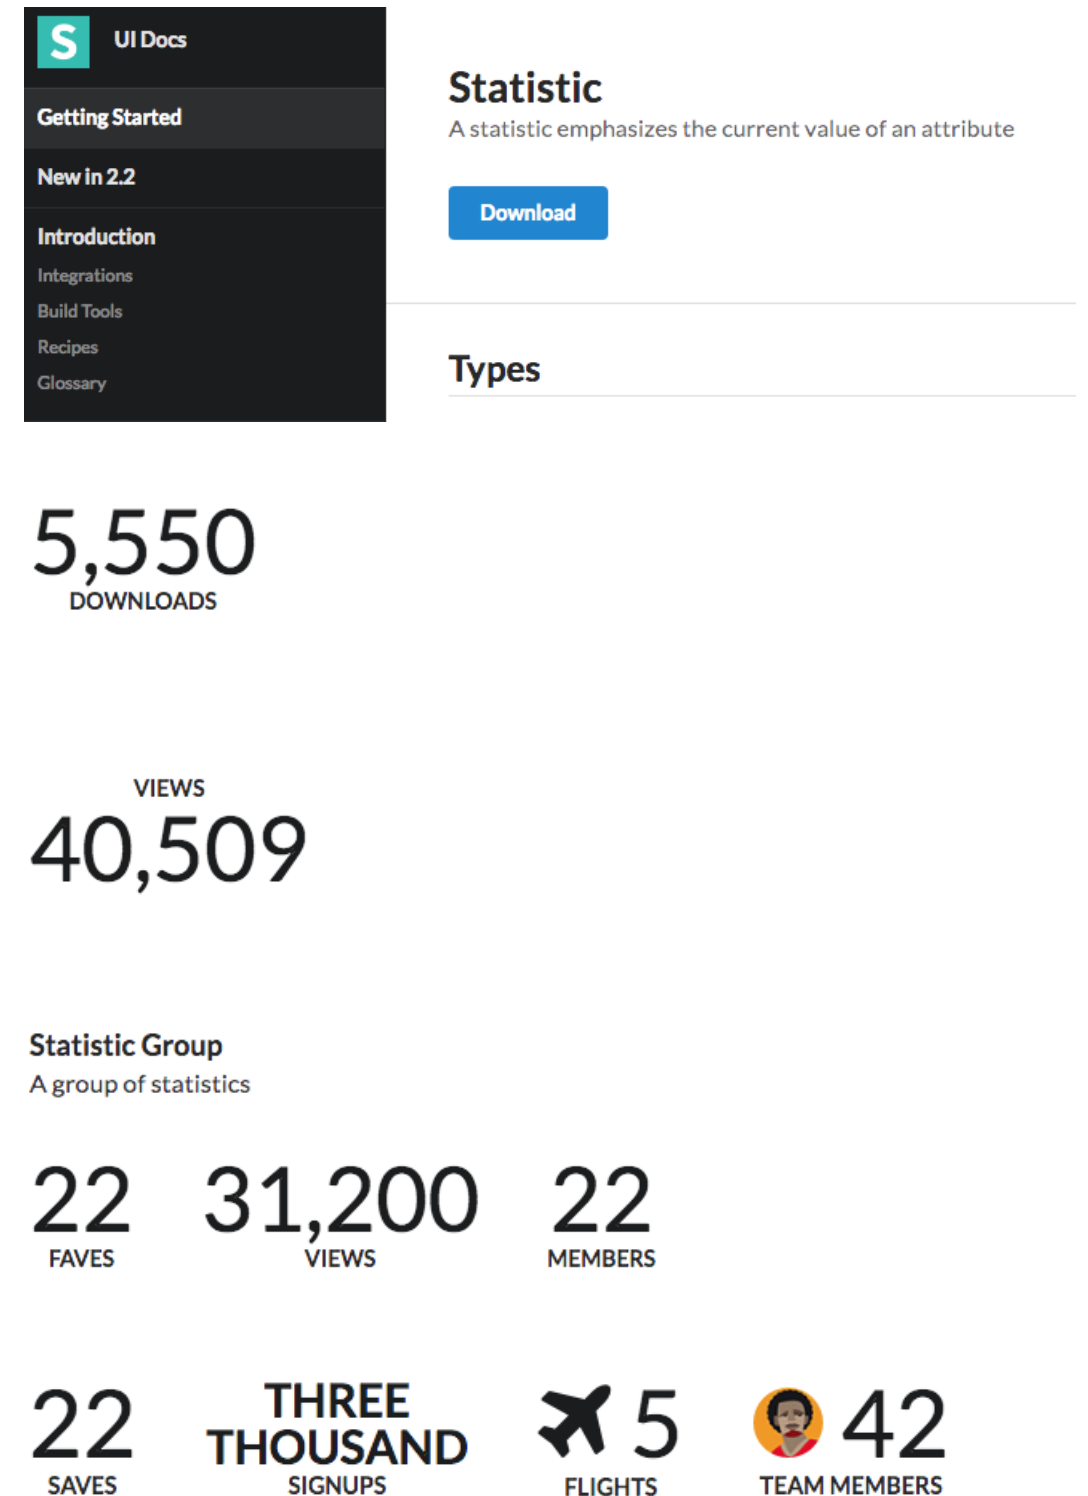

A panel displaying detailed statistics on the users bookmark collection

For individual user:

- total number of bookmarks
- total number of bookmark collections
- average number of bookmarks in each collection
- name of bookmark collection with most bookmarks
- name of bookmark collection with least bookmarks

Across all users:

- total number of bookmarks
- average number of bookmarks per user
- name of user with most bookmarks
- name of user with least bookmarks

# Images

Allow bookmark to  
have images

Form to add bookmark  
enables users to  
upload an image

Consider using  
Semantic UI 'Cards' to  
display bookmarks

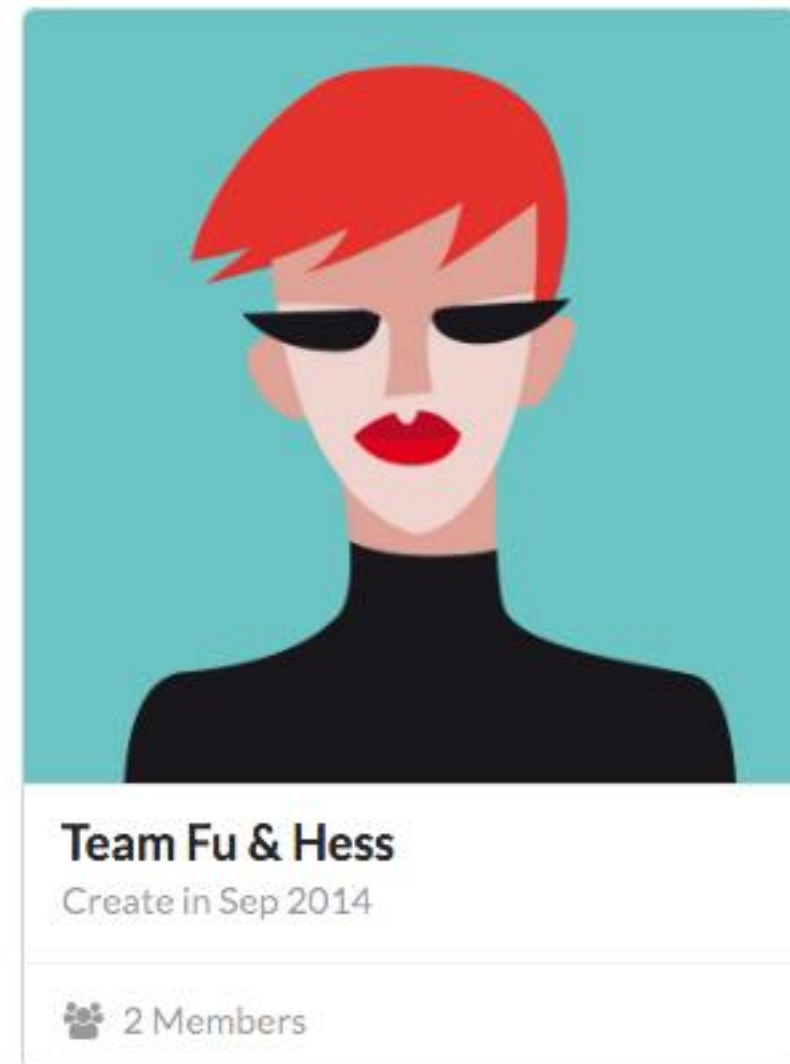

## Card

A card displays site content in a manner similar to a playing c

## Image

A card can contain an image

Cards can use [reveal](#) or [dimmers](#) to easily show additi

# Grading Spectrum

Grade Range	Authentication	Statistics	Images
Baseline	Login based on fixed set of users	per user total number of bookmarks. total number of bookmark collections	none
Good	Signup Form / Login based in dynamic users	per user name of bookmark collection with most bookmarks. name of bookmark collection with least bookmarks	Static images to enhance the UX
Excellent		across all users total number of bookmarks. average number of bookmarks per user	Single image per bookmark
Outstanding		across all users name of user with most bookmarks. name of user with least bookmarks.	Attractive Card layout
